

Lingual Orthodontics: 2 Days Hands-On Course

Maximum Participants Per Batch: 05, Course Fees: INR 25,000/-

Course Contents:

- Case Selection.
- Laboratory procedures (HIRO System)
- Biomechanics of lingual orthodontics
- Wire bending and arch form.
- Bonding and post bonding management.
- Retention protocol.

Orthodontic MSI, IZC & BS Implants: 1 Day Hands On

Maximum Participants Per Batch: 05, Course Fees: INR 5,000/-

Course Contents:

- Indications of TADs
- Surgical procedure (implant placement)
- Biomechanics
- Complications and their management

Orthognathic Surgical Planning: 2 Days Hands On

Maximum Participants Per Batch: 05, Course Fees: INR 25,000/-

Course Contents:

- Diagnosis
- Diagnostic Aids like CBCT & CT
- Cephalometrics for Orthognathic Surgery
- Various Orthognathic surgeries
- Paper Surgery
- Facebow transfer
- Model surgery & surgical splint
- Virtual Surgical Planning (3D Planning)
- Pre Surgical Orthodontics
- Post Surgical Orthodontics
- Surgery First Orthodontics vs Later approach

Course Faculty

Dr. Kirti Bansal (MDS Prosthodontics)

She has more than 11 years of experience in the field of dentistry. She is brilliant in her academics since her schooling. She was university topper during her graduation. She got selected in India's most prestigious medical institute AIIMS, New Delhi after securing 3rd rank in AIIMS PG Entrance Examination in 2010 and completed her MDS in Prosthodontics. She has also worked as JR in AIIMS. She topped AIIMS Senior Resident's

Examination and worked there as SR. During her tenure of more than 6 years in AIIMS, She has done more than 1000 cases of dental implants. She has also worked with ENT and Surgery Departments of AIIMS and placed zygomatic implants for rehabilitation of trauma and cancer patients. She has vast experience of fabrication of maxillofacial prostheses like Eye, Ear, Nose and rehabilitation of maxillary and mandibular defects. She has been trained in the 3D virtual planning for the reconstruction of mandibulectomy and facial defect cases. She has received her training in maxillofacial work from Sir Keith Thomas (UK). She is a Member of International Society of Maxillofacial Rehabilitation. She has been awarded from Dr. John Beumer for her work in maxillofacial prosthesis. She has been awarded from Government of India for her contribution for National Oral Health Programme.

Dr. Arvind Sivakumar (MDS Orthodontics)

He is Master of masters. He is AIPG Medical Entrance Exam's 1st rank holder (2008). He completed his MDS from prestigious dental college: MAMC, New Delhi. He has done many international fellowships: from Craniofacial orthodontic department, Chang Gung Memorial Hospital, Taiwan, Department of Orthodontics, Showa University School of Dentistry, Tokyo, Japan, and Swiss Cleft Fellowship from Nitte Meenakshi Craniofacial Centre, Department of Orthodontics (A.B Shetty Memorial Institute of Dental sciences, Nitte University, Mangalore).

He is invited speaker in many colleges, PG conventions and conferences. He conducts hands-on courses on Surgical Orthodontics & Surgery first approach, 3-D Computer Aided Surgical Planning (Simplant software), Cleft lip and palate Orthodontics and pre-surgical Nasoalveolar Moulding.

Dr. Pratap Saini (MDS Orthodontics)

He has more than 12 years of experience in the field of dentistry. He has worked as JR in AIIMS, New Delhi. He got selected in India's best dental college: MAMC, New Delhi after securing 4th rank in AIPG Medical Entrance Exam in 2011 and completed his MDS in Orthodontics. He secured 1st rank in AIIMS Senior Resident's exam in 2017. He has extensive experience in the field of Orthodontics and successfully treated more than 800 Orthodontic cases.

He is master in orthodontic treatment planning with placement of mini-implant, IZC and Buccal Shelf implants. He has done Lingual Orthodontic courses under world's renowned orthodontists i.e Rafi Romano (Israel), Giuseppe Scuzzo (Italy), Kyoto Takemoto (Japan) and Didier Fillion (Italy) and successfully treated more than 100 cases of Lingual Orthodontics. He has vast experience of treating Cleft-lip and palate cases and orthodontic treatment and planning of Orthognathic Surgical cases.

Dr. Shruti Goel (MDS Conservative & Endodontics)

She is a passionate endodontist who believes in providing excellent quality treatment in the most gentle manner. She has experience of over 8 years in dentistry. She completed her BDS from India's best dental college: Maulana Azad Institute of Dental Sciences (MAIDS), New Delhi. After securing 9th rank in AIPG Medical Entrance Exam, she completed her MDS in Conservative Dentistry and Endodontics from MAIDS, New Delhi. She has worked as Resident Doctor in AIIMS, Delhi

and Senior Resident in MAIDS. She also worked as Senior Associate Dentist in Clove Dental. Dr. Shruti Goel was a mentor for endodontics in Dental Study Circle and is leader for Dental Tubules study club in Delhi. An expert in the field of endodontics, she has vast experience in Root Canal Treatment and all kinds of difficulties associated with them like Re-Root canals, Treatment of open apex, calcified canals, missed canal, ledge bypassing and perforation management. She is trained under Internationally acclaimed clinicians in fields of Advanced Endodontics, Digital Smile design etc. She is Member of Indian Association of Conservative Dentistry. An avid academician, she has publications in national and international journals. She has presented papers and posters in various international and national conferences and has also helped in organising many workshops and conferences.

Academy of Advanced Dental Learning

Master's Course By Eminent Doctors from AIIMS & MAMC

Courses offered:

- ✓ Comprehensive Dental Implant Course (Hands-On)
- ✓ Implant Supported Full Mouth Rehabilitation Course
- ✓ One Day Implant Course For Distant Learner
- ✓ Tooth Supported Full Mouth Rehabilitation Course
- ✓ Fixed Prosthodontics Course (Hands-On)
- ✓ Maxillofacial Prosthesis Course (Maxillary Obturator, Ear, Nose, Eye, Finger Prosthesis)
- ✓ Lingual Orthodontics Hands-On Course (Only For Orthodontists)
- ✓ Orthodontic Mini-Implant Hands-On Course (Only For Orthodontists)
- ✓ Planning & management of Orthognathic Surgery Hands-On Course (Only For Orthodontists)
- ✓ Rotary Endodontics

Comprehensive Dental Implant Course: 5 Days Hand-On

Maximum Participants Per Batch: 05, Course Fees: INR 25,000/-

Course Contents:

- Day 1:**
- Advantage of Implant over FPD.
 - How to convince a patient for dental implants.
 - Understanding the bone quantity and quality for implant feasibility.
 - Studying the Implant provided by different companies: implant size and design i.e. material, collar design, pitch, surface treatment etc.
- Day 2:**
- Intra oral evaluation.
 - Diagnostic models and their importance for patients and Implantologists.
 - Examination of Radiographs and CBCT (in detail) required before implant placement.
 - Surgical stents.
- Day 3:**
- Surgical considerations of implant placement.
 - Different surgical techniques: flap and flapless and their indications.
 - Applied anatomy for surgical technique.
 - Various surgical tools and prosthetic components of implants provided by different companies.
- Day 4:**
- Prosthetic considerations before and after implant placement.
 - When you can fix a crown to implant: Immediate or delayed load.
 - How to select type of prosthetic crown: cement or screw retained crown.
 - What type of Occlusion should be given by prosthetic crown after implant placement.
- Day 5:**
- Post operative maintenance.
 - Various complications and their management.
 - How to manage reduced inter-arch distance.
 - How to manage distal Extension Cases
 - How to decide implant number, size and company?
 - How to increase successful implant prognosis?

Advanced Dental Implant Courses

Full Mouth Implant Supported Rehabilitation: 2 Days Course

Maximum Participants Per Batch: 05, Course Fees: INR 20,000/-

Course Contents:

- Diagnosis and treatment planning.
- Deciding prosthesis design- Bar retained hybrid prosthesis, cement retained or implant supported bridges.
- Inserting implants (surgical protocol) - location, number, size.
- Prosthetic procedural steps:
 - Impression making
 - Lab procedure
 - Prosthesis sitting
 - Delivery
 - Maintenance protocol.

Implant Retained Over Denture: 2 Days Course

Maximum Participants Per Batch: 05, Course Fees: INR 10,000/-

Course Contents:

- Diagnosis and treatment planning.
- Deciding prosthesis design- splinted or non splinted (using bar or locator).
- Inserting implants (surgical protocol)- location, number, size.
- Prosthetic procedural steps:
 - Impression making
 - Lab procedure
 - Prosthesis sitting
 - Delivery
 - Maintenance protocol.

One Day Implant Course For Distant Learner

Maximum Participants Per Batch: 05, Course Fees: INR 20,000/-

Course Contents:

- How to convince a patient for implant?
- Studying the Implant, understanding the prosthetic and surgical tools provided by different companies: implant design i.e. material, collar design, pitch, surface treatment and size etc.
- Evaluating patient for implant: Intra oral examination, Diagnostic models, Studying CBCT
- Different surgical techniques: flap and flapless and their indications
- Prosthetic restoration of implant (immediate and delayed load, cement or screw retained, occlusion)
- Maintenance, follow up and Complications
- How to select implant for a patient? (implant supplied from different companies)
- How to increase prognosis of implant?

Full Mouth Tooth Supported Rehabilitation: 2 Days Course

Maximum Participants Per Batch: 05, Course Fees: INR 10,000/-

Course Contents:

- Introduction to Hobo Takayama philosophy
 - How to select a case for full mouth rehabilitation (diagnosis)
 - Clinical consideration
 - Technique of restoration
- Note –Steps of tooth preparation not included.

Fixed Prosthodontics Short Courses

Maximum Participants Per Batch: 05, Each Course Fees: INR 6,500/-

- Course 1: Anterior and Posterior crown preparation (Hands On)
Course 2: Preparation for Tooth supported fixed prosthodontics/bridge (Hands On)
Course 3: Preparation for laminates (Hands On)
Course 4: Post and core preparation: case selection, selecting post material, post preparation and impression for metal post (Hands On)

Maxillofacial Prosthesis Courses

Ocular Prosthesis: 2 Days Course

Maximum Participants Per Batch: 05, Course Fees: INR 10,000/-

- Diagnosis and various techniques of making ocular prosthesis
- Making ocular impression (Live demonstration)
- Fabricating wax pattern
- Flasking, colour matching and packing and characterisation
- ProstShesis delivery

Orbital Prosthesis: 2 Days Course

Maximum Participants Per Batch: 05, Course Fees: INR 20,000/-

- Case selection for spectacle and adhesive retained prosthesis.
- Making face impression and pouring (Live Demonstration)
- Fabricating wax pattern and obtaining spectacle impression onto pattern.
- Flasking, colour matching and silicone packing and characterisation (demonstration).
- Prosthesis delivery.

Implant Supported Maxillofacial Prosthesis Courses

Maximum Participants Per Batch: 05, Each Course Fees: INR 25,000/-

- Course 1 (Implant supported orbital Prosthesis): 4 Days Course
Course 2 (Implant supported Nose Prosthesis): 4 Days Course
Course 3 (Implant supported Auricular Prosthesis): 4 Days Course

❖ All three courses' combined fees: INR 50,000/-

Course Contents:

- Diagnosis and treatment planning.
- Selecting implants for respective locations: number, location and type.
- Inserting implants: surgical consideration (primary and second stage surgery).
- Prosthetic procedure:
 - Making facial impression (demonstration).
 - Sitting of bar or adjusting locator or magnet attachment onto face, conformer fabrication.
 - Sculpting wax pattern and eye or ear anatomy.
 - Flasking and silicone packing (demonstration).
- Delivery of prosthesis and maintenance protocol.

Comprehensive Rotary Endodontics: 2 Days Hand-On

Maximum Participants Per Batch: 05, Course Fees: INR 10,000/-

Course Contents:

- Diagnosis and Radiographic Interpretation
- Tooth morphology and Access opening
- Cleaning and Shaping of Root Canal System
- Obturation
- Management of difficult cases and procedural mishaps
- Armamentarium required for endodontics
